EXECUTIVE SUMMARY

The world of crypto-currencies is currently going through a period of excitement, with growing adoption and a resurgence in liquidity, mainly driven by the entry of institutional investors. This trend is creating an environment conducive to innovation, paving the way for exciting new opportunities in the sector.

Against this dynamic backdrop, NFT technology is increasingly standing out. Although the market has recently slowed down, awareness among the general public and developers alike of the power of NFTs has never been higher. These unique tokens offer significant advantages such as unrivalled security, transparency and traceability, extending their potential far beyond digital art.

At the heart of the Crypto Robots City Project (CRC) beats the vibrant pulse of a truly community-based initiative. As crypto-currencies make their way into the financial future, CRC sets itself apart by forging closer ties. More than just a collection of NFTs, CRC is a thriving community where every NFT holder becomes an active citizen of this digital metropolis. Here, unique art is not limited to a transaction, but becomes the foundation of a shared experience, rooted in the very essence of collaboration and collective creativity.

·Global Market Cap Since 2014 (in billion)

CRYPTO ROBOTS CITY, AN INNOVATIVE PROJECT

At the heart of Crypto Robots City (CRC), we're building a fortress of values that transcend the simple framework of an NFT project. Our commitment to community spirit is the foundation on which CRC's dynamic is built. We firmly believe in the power of collaboration and the active participation of every member, for it is in this unity that our digital metropolis comes to life. We don't just create NFTs, we build an engaged and connected community.

Quality is in CRYPTO ROBOTS CITY's DNA. This goes far beyond the captivating design of our NFTs. Every detail, from the user experience on our website to end-to-end security, is meticulously crafted to deliver unparalleled excellence. Each NFT is not only a work of art, but also an immersive experience carefully crafted for every cardholder. We strive for excellence every step of the way, because that's how we advance not just our project, but the entire NFT sphere.
Innovation is our compass. We aspire to be at the forefront of the blockchain project space, constantly pushing boundaries and exploring new horizons. CRC is not just a project, it's an ecosystem that evolves with market trends and the needs of our community. We anticipate change and constantly adapt to offer an exceptional experience to our NFT holders.

Security, reliability and transparency are the pillars on which our ambitions are built. We have rigorous security protocols in place to protect our community's assets. We believe in an uncompromising experience, where our NFT holders can have complete confidence in the safety of their investments.
In this way, Crypto Robots City is not just an innovative project. It's a holistic vision, a fusion of art, technology, quality and community, creating an experience that transcends simple NFT transactions.

Beyond the foundations of community spirit, the quest for quality and constant innovation, Crypto Robots City (CRC) also embodies a vision that extends beyond the digital. We aspire to create a bridge between the virtual world of NFTs and the real world, offering tangible opportunities to our community. We believe in the positive influence that blockchain technology can have on society, and we seek to catalyze this change through charitable initiatives, socially responsible partnerships and actions that leave a lasting footprint.
Crypto Robots City isn't just a digital metropolis, it's a benevolent force that aspires to transcend the boundaries of digital space to create a positive impact in the real world. We're shaping the future, not just in pixels and code, but through concrete actions that leave a lasting imprint.

In today's financial landscape, inflation looms as an implacable adversary, particularly for modest investors lacking effective means of countering it. It is into this gap that Crypto Robots City (CRC) emerges with a clear mission: to offer an accessible and secure investment solution, democratizing access to financial opportunities.
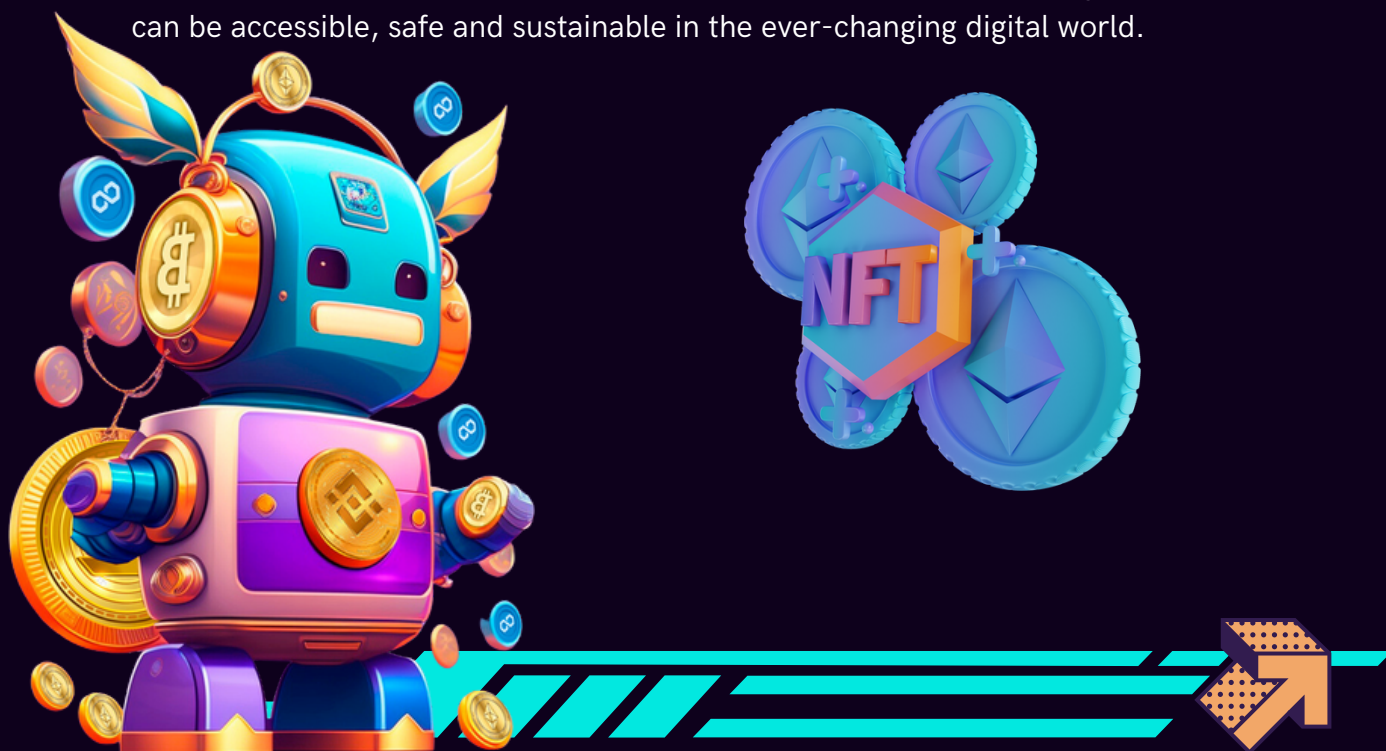

CRYPTO ROBOTS CITY's fundamental aim is to create a financial haven for modest investors facing the challenges of inflation. We aspire to provide an accessible and inclusive means of protecting asset values in an ever-changing economic environment.
CRYPTO ROBOTS CITY is committed to maintaining a secure platform without compromising accessibility. We invest in robust security protocols, ensuring that every NFT holder can invest with confidence, without fear of potential threats in the digital world.

Our ultimate goal is to ensure CRC's longevity. We are not content to be an ephemeral solution. On the contrary, we aim to create a platform that evolves over time, capturing bull run opportunities while remaining resilient in the face of market fluctuations.

CRYPTO ROBOTS CITY aims to become a liquidity magnet, attracting investors through our innovative approach. Our goal is to maximize profits not only for the CRC team, but also for every NFT holder, creating a virtuous circle of prosperity.
CRC aspires to reinvent the perception of investing, making it accessible, transparent and rewarding for all. Our vision goes beyond the simple creation of NFTs, it encompasses the creation of a financial ecosystem where innovation and equity are the watchwords.

As a conscious project, CRYPTO ROBOTS CITY explores sustainable and socially responsible solutions. We seek to minimize our environmental footprint while contributing positively to social causes, thus integrating social responsibility at the heart of our objectives.
In this way, Crypto Robots City rises above mere financial objectives to embody a complete and holistic vision. We're not just a project, we're a proposal to change the way investment can be accessible, safe and sustainable in the ever-changing digital world.

CRYPTO ROBOTS CITY NFT COLLECTION #SEASON1

In the heart of our emerging digital metropolis, Season 1 of Crypto Robots City's NFT collection promises to be an unprecedented immersion in digital art. This inaugural season, anchored on the Ethereum network, is distinguished by carefully crafted features, reflecting our commitment to accessibility and diversity.

To ensure maximum accessibility, CRC Season 1 will be available on OpenSea, the leading NFT marketplace. This collaboration with OpenSea offers our owners a reliable and recognized platform to explore, exchange and enjoy their collection to the full.

Dive into Season 1 of Crypto Robots City and discover a collection that transcends the boundaries of digital art, offering a diversity of experiences for every NFT holder. This inaugural season marks the start of an unforgettable journey through our ever-expanding digital metropolis.

#SEASON1
Network: ETH
Supply: 1565
Mint price: 0.02 ETH
Mint date: January 12

CRC Season 1 unveils a fascinating array of characters and elements, each helping to shape the identity of our digital metropolis. Owners will be able to choose from a range of categories, from Work Robots to Battle Bots, from City Landscapes to Crypto Cards. These different categories add unrivalled diversity to the collection, offering a varied experience for every NFT owner.

Get ready for a never-ending adventure, because Season 1 is just the first chapter in an epic that promises to constantly push back the boundaries of innovation and creativity in Crypto Robots City.

BENEFITS OF OWNING CRC SEASON 1 NFTS

Owning one or more Crypto Robots City (CRC) Season 1 NFTs transcends the digital art experience to become a complete immersion in a universe where each holder becomes an active participant and beneficiary of a multitude of exclusive benefits.

Among the most exciting benefits for our NFT holders is the prospect of an aerial distribution of CRC tokens. Details of this distribution will be revealed in due course, adding a dimension of anticipation and value to the collection. This initiative is our way of rewarding the loyalty and commitment of our community.
CRC Season 1 is much more than just a collection of NFTs, it's a passport to an ever-expanding digital metropolis. Each NFT embodies membership of our vibrant community, where holders play an active role in shaping the future of Crypto Robots City.

At the heart of our benefits is the ongoing remuneration of NFT holders. The various fees generated by our ecosystem, from the cash pool and other sources, are systematically redistributed to holders. This form of passive return provides a unique opportunity for holders to actively contribute to CRC's growth.

The fees generated by CRC ecosystem activities, such as transactions and exchanges, do not remain static. They are regularly redistributed to NFT holders, creating an incentive mechanism closely linked to the growth of the ecosystem and the benefits accumulated by our holders.

OG and WL members enjoy exclusive privileges, with preferential mint prices (0.01 ETH for OG and 0.015 ETH for WL). In addition, these members will have access to extra benefits such as participation in exclusive prize draws and access to a private chat room. This distinction reinforces the unique experience reserved for our OG and WL members.

The ongoing remuneration of NFT holders creates a stable and constantly growing financial ecosystem. By participating in the cash pool and receiving regular financial benefits, holders become key players in CRC's sustainability, providing a reassuring and reliable experience for our community.

By regularly redistributing the income generated by the ecosystem, CRC establishes a strong alignment between the interests of the team, the community and NFT holders. This dynamic benefits everyone, strengthening the commitment and sense of belonging to our thriving community.

CRC TOKEN OVERVIEW & TOKENOMICS

The CRC Token emerges as the vibrant heart of Crypto Robots City (CRC), symbolizing our official motto and embodying the fundamental principles of our growing digital metropolis. Developed on the Polygon underlay, the CRC Token is not simply a currency, but an essential instrument that drives community spirit and ensures meaningful rewards within our ecosystem. As the official currency of Crypto Robots City, the CRC Token goes beyond its monetary function. It embodies community spirit and becomes a symbol of belonging to our ever-evolving digital metropolis.

The CRC Token is not simply a means of transaction, it's an essential utility token. It confers significant benefits, enabling holders to participate in governance and access exclusive advantages.The CRC Token plays a central role in the distribution of rewards within our ecosystem. Holders are eligible for a variety of rewards, creating a continuous opportunity for profit as CRC grows.

As part of our commitment to security and stability, a secure liquidity pool will be built. This ensures that liquidity within our ecosystem is protected, minimizing risk and creating a reliable financial environment.
 CRC Token holders can contribute to this liquidity pool, actively participating in the security and stability of our ecosystem. This active participation is rewarded, strengthening the link between the community and the financial health of Crypto Robots City.

From a technical point of view, the CRC Token has a total supply of 100,000,000, reinforcing its stability within the Polygon network. The official contract address is 0x294AA56fa5d0E147Db40d2F04B6Bc6fd88Ad3ef1, guaranteeing transparency and accessibility for our community.

As part of our ongoing efforts to ensure the security and integrity of our ecosystem, we plan to carry out an in-depth security audit in the near future. This crucial step is designed to strengthen our community's trust in CRC Token, ensuring a reliable and secure user experience.
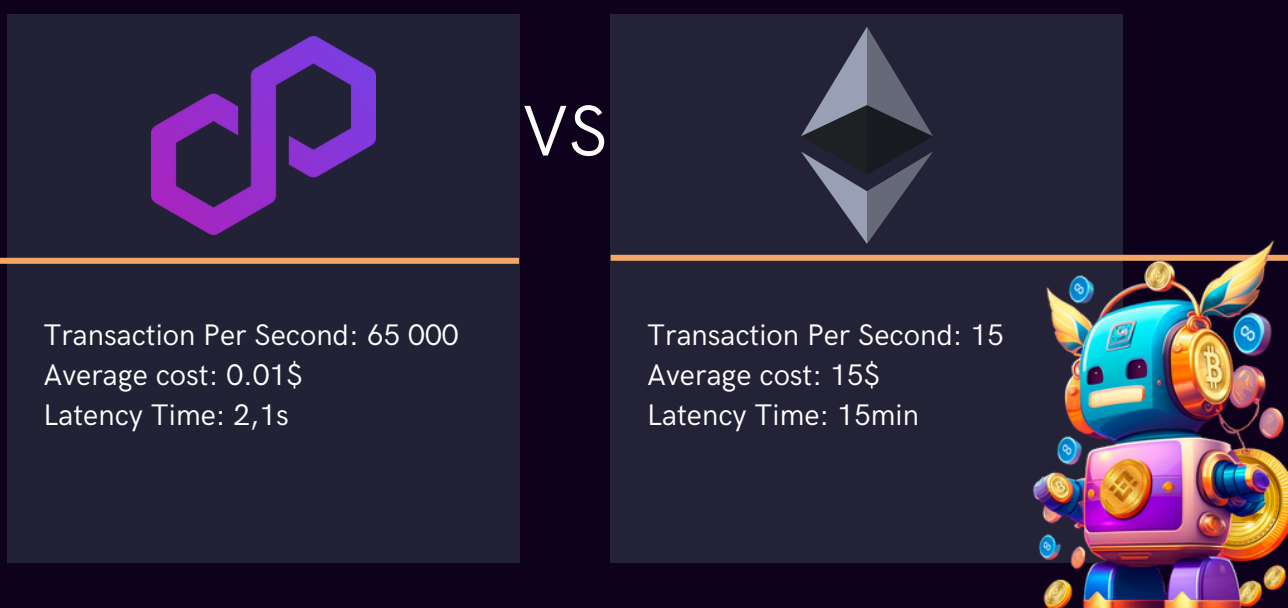

Stay tuned for further announcements regarding our pre-sale schedule. Full details will be communicated on our official networks and website, giving our community all the information they need to participate in an informed way in this important phase of our project.

POLYGON: CATALYST FOR EFFICIENCY AND SECURITY IN OUR DIGITAL METROPOLIS

Polygon's carefully planned integration into the Crypto Robots City (CRC) ecosystem transcends the mere technical component to become an elaborate strategy, consistently aligned with our fundamental vision. Unlike the traditional approach of seeing different blockchain solutions as competitors, we see Polygon as an essential ally that complements Ethereum.

This strategic alliance gives our digital metropolis an essential dimension of scalability, lower cost and faster transactions. Far from being a dilemma between accessibility and security, our choice to work with Polygon illustrates our desire to harmonise these two crucial aspects, paving the way for an optimal user experience within CRC.

VS

Transaction Per Second: 65 000
Average cost: 0.01$
Latency Time: 2,1s

Transaction Per Second: 15
Average cost: 15$
Latency Time: 15min

The symbiosis between Ethereum and Polygon creates an environment where investors can transact at lower cost, benefiting from greater affordability. The speed of transactions, a direct result of the scalability offered by Polygon, adds a crucial dimension to the responsiveness of our digital metropolis. What's more, security, a fundamental element preserved by Ethereum, remains intact, ensuring investor confidence in every interaction within our ecosystem.

By choosing Polygon as our strategic partner, we are bridging the gap between investors' financial return and a smooth transaction experience, reflecting our commitment to providing a breeding ground for prosperity and trust within Crypto Robots City.

CRC   CRYPTO ROBOTS CITY (CRC),
       AN NFT ETHEREUM-CHAIN PROJECT   07

ROADMAP #SEASON1

1

A certain stock of 1565 unique digital arts, 21 wild card NFTS to give away to the first buyers will be available to mint on our official website and in OPENSEA. (1 NFT refund tokens only in OpenSea).

2

Create our website and our smart contract to carry out the mint through a subdomain of the main page

3

Create a whitepaper with all the details of the project and the audit of our smarth contracts

4

We created a discord, tweeter, youtube and telegram, we started listing the project on different pages like nft callendar.

5

We plan the different prices and benefits for our whitelisted and OG members.

6

We create our own token for the project and give it various benefits and functions.

7

The Lorebook virtual manual that explains the meaning of each type of NFT listed, is available to holders of both nets.

# CRYPTO ROBOTS CITY ARCHITECTS

FOUNDER - ASMODEUS GONTIER

I am a great enthusiast of blockchain technology, I have 2 years of experience in web3, nfts and crypto investments, I am also a trained architect and graphic designer with a lot of experience in fields such as video editing, artistic drawing, digital art and video games.

COLLAB MANAGER - BMO

Hello ! My name is Bmo
I would love to be part of the team as collab manager / alphab Hunter . I will be working 10-12 hours daily and can perform a minimum of 10-15 collabs per day. I'm Targeting 100-150 Collabs in a week ! .My time zone is GMT +5 .Aside this, I'm certain of bring organic members into the community through the collabs, also I'll bring positive thoughts and suggestions that will enhance the overall Progress of the project . Im very certain you will never regret hiring me.

CEO & PARTNER - SEO_WEBSITE

My name is SEO. I have been working in the crypto and NFT's industry for almost three years, providing services such as moderation, server setup, promotion, and website development. I have successfully completed many projects for various clients, helping them achieve their goals and grow their online presence.
